

All-In-One Live Production Systems

Create. Stream. Captivate.

Key Features of Broadcast Pix Integrated Production Solutions

All-in-One Simplicity

Produce, switch, stream, and record—all from one intuitive system with built-in audio, graphics, clip store, and automation tools.

Customizable & Scalable

From the compact 4-input StreamingPix to the powerful 22-input GX Hybrid, every Broadcast Pix system delivers SDI and IP input flexibility, high-definition multi-format processing, and seamless adaptability to any workflow or budget.

Flexible Control

Control locally or remotely via our browser-based Commander or BPview interfaces. Use a touchscreen, tablet, laptop, or control panel. Add Stream Deck, MIDI, or Xbox for enhanced versatility—studio, on-location, or remote.

Smart Automation

One-touch macros, chromakeying, robotic camera control, and automated effects simplify complex productions.

Built-In Live Captioning

VoCaption provides real-time automated captions to improve accessibility and engagement.

Stream Anywhere

Stream to YouTube, Facebook, Vimeo, or any RTMP/CDN—or multicast to multiple destinations with integrated Switchboard Live.

Experience effortless live production

Broadcast Pix empowers creators of all experience levels

Produce professional live content simply, efficiently, and affordably.

Our Models - Tailored To Your Needs

StreamingPix

StreamingPix makes it easy to create and stream live video. With full customization, real-time monitoring, and IP input support, you can build your ideal streaming solution.

The Hybrid Series

Flexible, scalable systems for hybrid, multi-format productions. Available in 3 I/O configurations ranging from 10–22 inputs, the Hybrids are future-proof and feature-rich.

The Roadie

Make it portable! Our FX and MX Hybrids are also available as rugged, portable Roadies, complete with a 21" display and carrying case—perfect for on-the-go live productions.
