

FUSION
CORPORATE AV FURNITURE

FUSION

Smart Furniture for a Connected World

FUSION by Ergovisual offers advanced AV furniture solutions designed to elevate hybrid and collaborative workspaces to the next level. FUSION features sleek, contemporary technical furniture that projects a modern image for connected corporate environments.

Perfectly blending technology, aesthetics, and functionality, FUSION AV furniture is ideal for multimedia spaces.

FUSION is smart furniture crafted in Barcelona for a connected world.

AV CREDENZA page. 03

Technical cabinet to host technology and AV equipment in meeting rooms. It improve space functionality and aesthetics of the environment.

DS CREDENZA page. 05

Enhanced AV Credenza incorporating stands for XL monitors and led screens. Displays perfectly wired, technology protected, discrete and elegant.

DS CREDENZA CHART page. 09

DS Credenza Chart, the mobile version of the classic DS Credenza, allowing displays up to 75" to be moved safely. Technology stays neatly organized, protected, and always ready, with an elegant and discreet design.

SLIM CREDENZA page. 11

Slim Credenza, a freestanding and modular solution with a sleek design, supporting large-format displays safely. Technology neatly organized and protected, combining functionality, versatility, and elegant aesthetics.

E-CREDENZA page. 13

Premium AV Credenza with electronic height adjustment of monitors. Comfort, Ergonomics and Distinction for any interactive room.

VIDEOWALL page. 15

Modular design to build videowalls of any size, housing all necessary technology in integrated compartments. No additional work or room preparation required. Ready for monitoring, crisis, or control rooms.

TEAMS MEETING page. 17

Smart meeting desk with technical compartment for perfect integration of AV technology. All components store and protected, and all cables perfectly wired and hidden.

BOARD MEETING page. 21

Stylish meeting table for boardrooms and crisis rooms, designed to seamlessly integrate pop-up monitors and rack technology. Combines modern aesthetics with enhanced collaboration.

EXECUTIVE MEETING page. 25

Sleek design for hybrid and executive spaces, featuring a technical beam for organized devices and cables. Modular layout ensures flexibility and functionality for collaborative work environments.

CONFERENCE page. 29

Executive meeting desk designed to boost collaboration and eye contact, perfect for both regular and hybrid meetings. Available in ARC, U, and V-shapes, it emphasizes functionality and interaction, creating an elegant forum space.

HUDDLE page. 33

Compact and versatile furniture, ideal for quick meetings, brainstorming, project management, and videoconferences. Designed to foster creativity and teamwork in a sleek and functional workspace.

AUDITORIUM page. 35

Functional conference desks and lecterns, designed to integrate AV technology and cables seamlessly. Modular design allows quick setup, easy relocation, and adaptability for dynamic, multipurpose spaces.

MEDIA BOX page. 37

Slim and stylish furniture for collaborative spaces that discreetly integrates, protects and organizes AV equipment, allowing easy installation and maintenance.

MEDIA CABINET page. 39

Hybrid furniture that neatly organizes small active devices, while offering a separate compartment that can be used for storage. Dual use in a practical AV cabinet with minimal space usage.

MATERIALS & FINISHES page. 41

The FUSION range is crafted with high-quality and ECO materials, ensuring durability and a stylish design that seamlessly complements modern corporate environments.

EXECUTIVE CHAIRS page. 45

Executive chairs for any collaboration space, combining comfort, ergonomics, and distinctive style. Designed to suit both sophisticated and classic environments, tailored per project to meet specific needs.

ACCESSORIES page. 46

Solutions to enhance hybrid spaces, including cable management, 19" rack frames, display mounts, and integrated connectivity. Designed to maximize the functionality of AV furniture.

AV Credenza is a sleek and functional 19-inch rack cabinet designed for corporate environments.

It offers secure storage for electronic devices while providing efficient cable management to keep your space organized and clutter-free.

With modular construction, it can be configured in various formats and sizes for perfect fit-in to any space.

Features:

a Passive airflow

c Easy maintenance

d Modular design

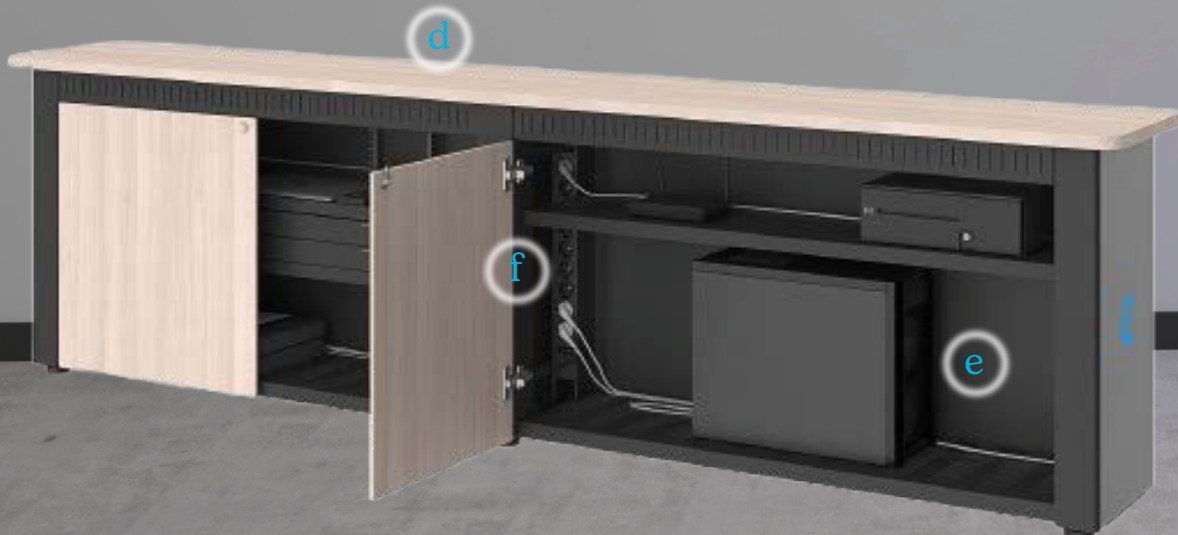

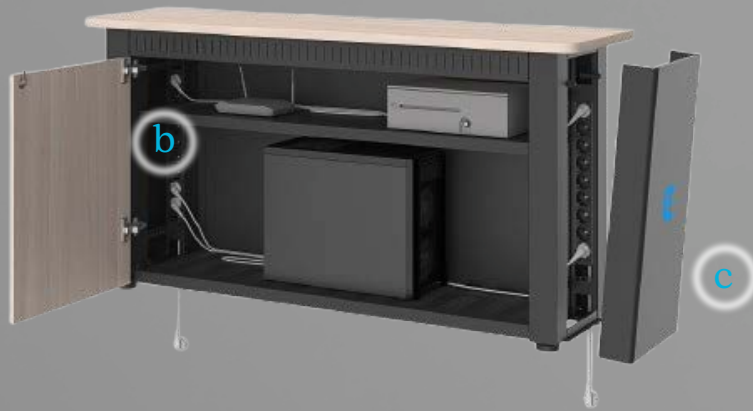

e Interior PET recycled acoustic panel

f 4U Vertical Rack 19"

g Horizontal Rack 19" & Shelves (as option)

h Refined aesthetics

i Custom Backlighting logo (as option)

AV CREDENZA

DS CREDENZA

DS Credenza incorporates vertical stands for XL monitors and Led screens with optimized cable management and acoustic PET panel.

DS Credenza

Big Screens. Zero Construction. Maximum Flexibility.

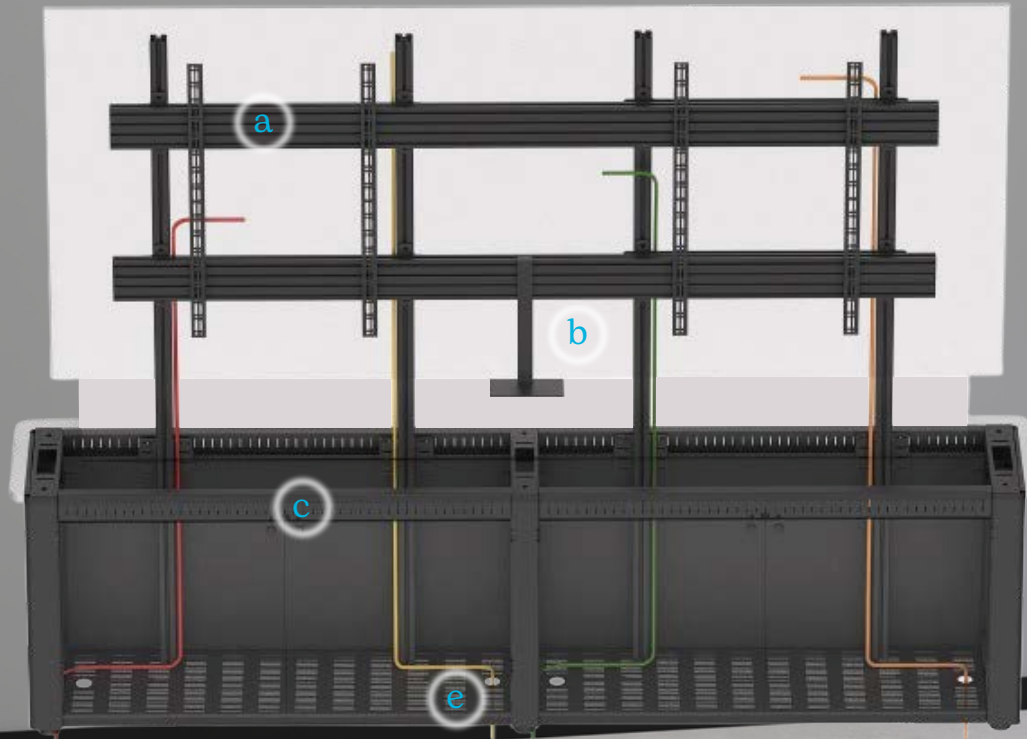

DS Credenza is a freestanding AV cabinet designed to support large-format displays, from 49" monitors to 136" all-in-one LED screens—without the need for wall reinforcement or room preparation.

- Modular Design – Combine multiple units for larger or multi-screen installations
- Heavy-Duty Support – Engineered to safely hold oversized and heavy displays
- Height-Adjustable Stands – Included for easy adaptation to various screen sizes
- Standalone & Site-Ready – Fast, clean installation—no structural work required
- Versatile Applications – Ideal for lobbies, meeting rooms, events, and temporary setups

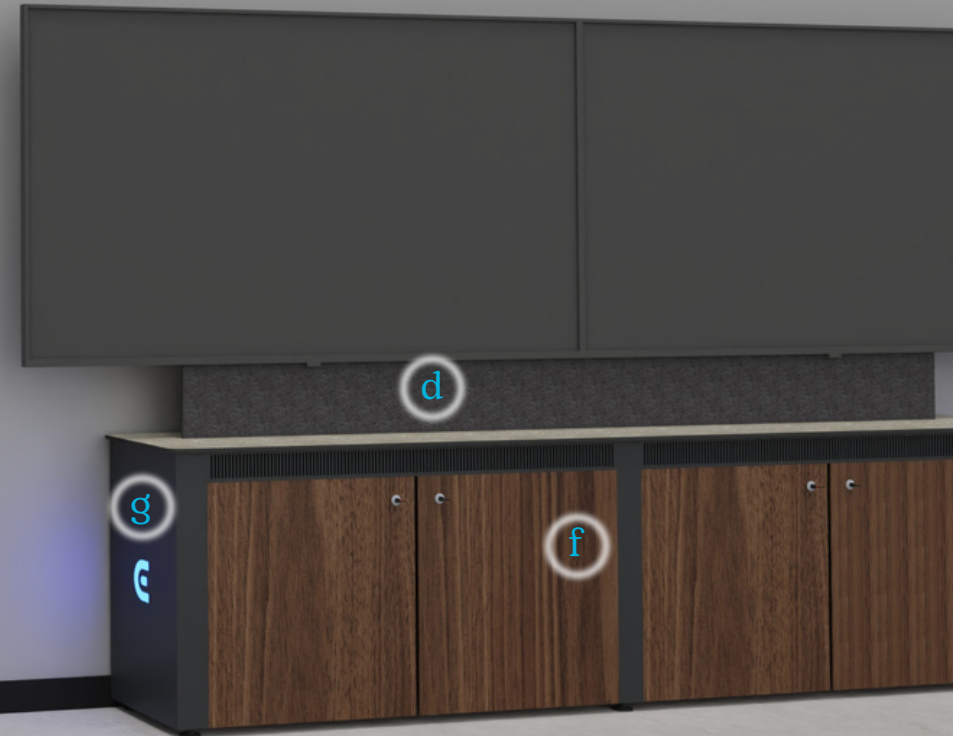

DS Credenza delivers power and flexibility—just set it up and go.

Features:

- a** Different height stands available
- b** Heavy Duty for large screens
- c** Passive airflow
- d** Acoustic treatment outside/inside cabinet
- e** Concealed cable management
- f** Full accessibility
- g** Refined aesthetics

DS CREDENZA CHART

Mobile version of the elegant technical cabinet, designed to host technology and displays in meeting rooms with complete safety.

DS CREDENZA CHART

DS Credenza Chart

The DS Credenza Chart is the mobile version of the DS Credenza, designed for full mobility without compromising the robustness, safety of our AV line. It's ideal for corporate environments, education, events, and temporary or multi-rooms setups.

Its modular design allows the system to be moved without interfering to the installed equipment/cables, keeping everything neat and functional, just plug & play.

Mobility & Functionality

- Supports monitors up to 75" with safe weight distribution.
- Can be moved with all technology fully integrated.
- Modular design, compatible with the entire DS Credenza range.
- Includes standard 19" vertical rack units, and as option horizontal 19" rack profiles(13U).

Key Technical Features

- High-strength structure with premium finishes.
- Integrated cable management for a clean and safe setup.
- Heavy-duty wheels with built-in safety brakes.
- Base designed for optimal stability.
- Customizable finishes to meet customer's identity.

A mobile, elegant, and reliable solution that combines design, engineering, and functionality for professional installations.

SLIM CREDENZA

Slim Credenza, a freestanding solution for glass rooms, combining secure display support with minimalist and elegant design.

Slim Credenza

The Slim Credenza is a sleek, self-supporting solution, ideal for corporate spaces, meeting rooms, and multi-screen setups. It combines minimalist design, modularity, and reliable structural support.

Installation Options

Standalone

- Supports monitors up to 75".
- Reinforced base, no anchoring required.

Wall-mounted

- Single monitors up to 98".
- Dual monitor up to 75".
- Stable and secure, perfect for maximizing space.

Dual/ Group

- Multiple units connectable for multi-screen setups.
- Easy to expand or reconfigure as needed.

Key Technical Features

- Vertical 19" rack units both sides.
- Rear mounting plate as option.
- Optional LED accent lighting.
- High-strength materials with premium finishes.
- Integrated cable management and easy maintenance access.
- Stable, customizable structure and base.

An elegant, reliable, and adaptable solution that combines design, engineering, and functionality for corporate environments and board rooms.

SLIM CREDENZA

HA CREDENZA

allows the screen height to be adjusted to suit the needs of each meeting, offering flexibility and adaptability in corporate environments.

The HA version of the FUSION range allows the integration of essential accessories for hybrid meetings, such as cameras, microphones, and speakers.

Additionally, it ensures an organized and private cable management system, providing an efficient solution for collaborative spaces like Microsoft Teams Rooms and Zoom Rooms.

Single
Credenza

1400mm (W): 50" ~65"

POP-UP CREDENZA

with an electronic mechanism that hides and unfolds the screen as needed, ideal for versatile spaces.

The FUSION range includes a pop-up monitor option that is stored inside the credenza and rises through a foldable lid, which remains completely flat when not in use.

This solution allows for height adjustment to adapt to different types of meetings, providing flexibility for collaborative sessions, team meetings, or individual work.

Single
Credenza

1400mm (W): 50" ~65"

VIDEOWALL

Designed to support multiple displays in double or triple height, with greater cabinet depth to host all technology of videowall inside.

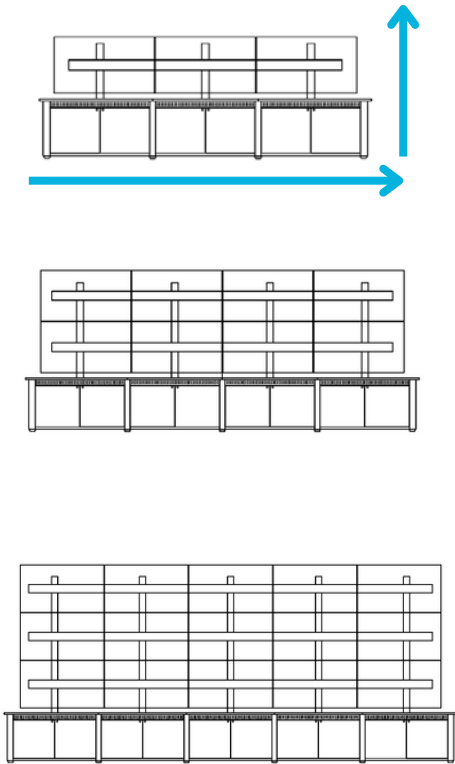

Credenza Videowall

Modular Strength for Mission-Critical Displays

The Credenza Videowall is a robust, modular solution built to support multi-screen setups in high-demand environments like control rooms, operations centers, and broadcast spaces.

- Extra Depth (600 mm) – Ensures superior stability for single, dual, or triple-height configurations
- Scalable Design – Modular cabinets allow systems to expand as needed
- Flexible Mounting – Supports monitor installation on internal tray or wall, ideal for heavy displays
- Integrated Storage – Houses 19" rack equipment securely within the structure
- Clean & Efficient – Combines support, organization, and accessibility for professional-grade performance

Credenza Videowall delivers the reliability and flexibility needed for seamless, scalable videowall installations—no compromise.

VIDEOWALL

Credenza 1600mm (W): 4x55"*

*Triple
Credenza 1400mm (W): 9x55"*

*Quadruple
Credenza 1400mm (W): 8x55"*

TEAMS

Smart meeting desk with technical compartment for perfect integration of AV technology. Suitable for video conferencing, optimized for platforms like Microsoft Teams and Zoom.

TEAMS

Smart. Flexible. AV-Ready.

The Teams model is the ideal solution for integrating AV technology into meeting spaces—combining flexibility, clean design, and professional-grade performance.

The ideal solution for AV-equipped meeting rooms—modular, functional, and future-ready.

Features:

- Modular Design - Flexible configuration for any room size or setup.
- 19" Rack Integration - Professional AV organization made simple.
- Built-in Cable Management- Clean, clutter-free installations every time.
- Minimal, Modern Aesthetic - Engineered to complement contemporary interiors.

Tailored to Your Needs

- For Integrators: Fast, clean installs with rack-ready structure.
- For Architects: Technical function without compromising design.
- For End Users: Intuitive, reliable, and future-ready meeting spaces.

Available Configurations:

- **Straight** – A clean, linear setup ideal for executive briefings and streamlined communication
- **V-Shape** – Promotes engagement and visibility, ideal for hybrid meetings and presentation-focused discussions
- **Oval** – Enhances eye-communication and team discussion

Each configuration is designed to optimize eye contact, spatial flow, and collaborative efficiency, depending on your team's interaction style and room dynamics.

BUILT TO ADAPT. DESIGNED TO IMPRESS.

Bring simplicity, structure, and style to your AV projects with the Teams model.

BOARD

Stylish meeting table for boardrooms and crisis rooms, specially designed to seamlessly integrate interactive pop-up monitors and rack technology inside.

BOARD

Elegant Design. Integrated AV. Total Customization.

BOARD is a high-end meeting table for boardrooms and crisis rooms, designed to integrate pop-up monitors, AV and rack technology, and multi-vendor equipment—all within a sleek, modern form.

Features:

- AV-Ready Design – Built-in support for professional AV systems and interactive tech
- Fully Customizable – Modular structure tailored to your room and workflow
- Premium Materials – Available in compact laminate, natural wood, and more
- Seamless Integration – Designed for functionality without compromising aesthetics

Perfect for integrators, architects, and end users, BOARD is where advanced technology meets refined design.

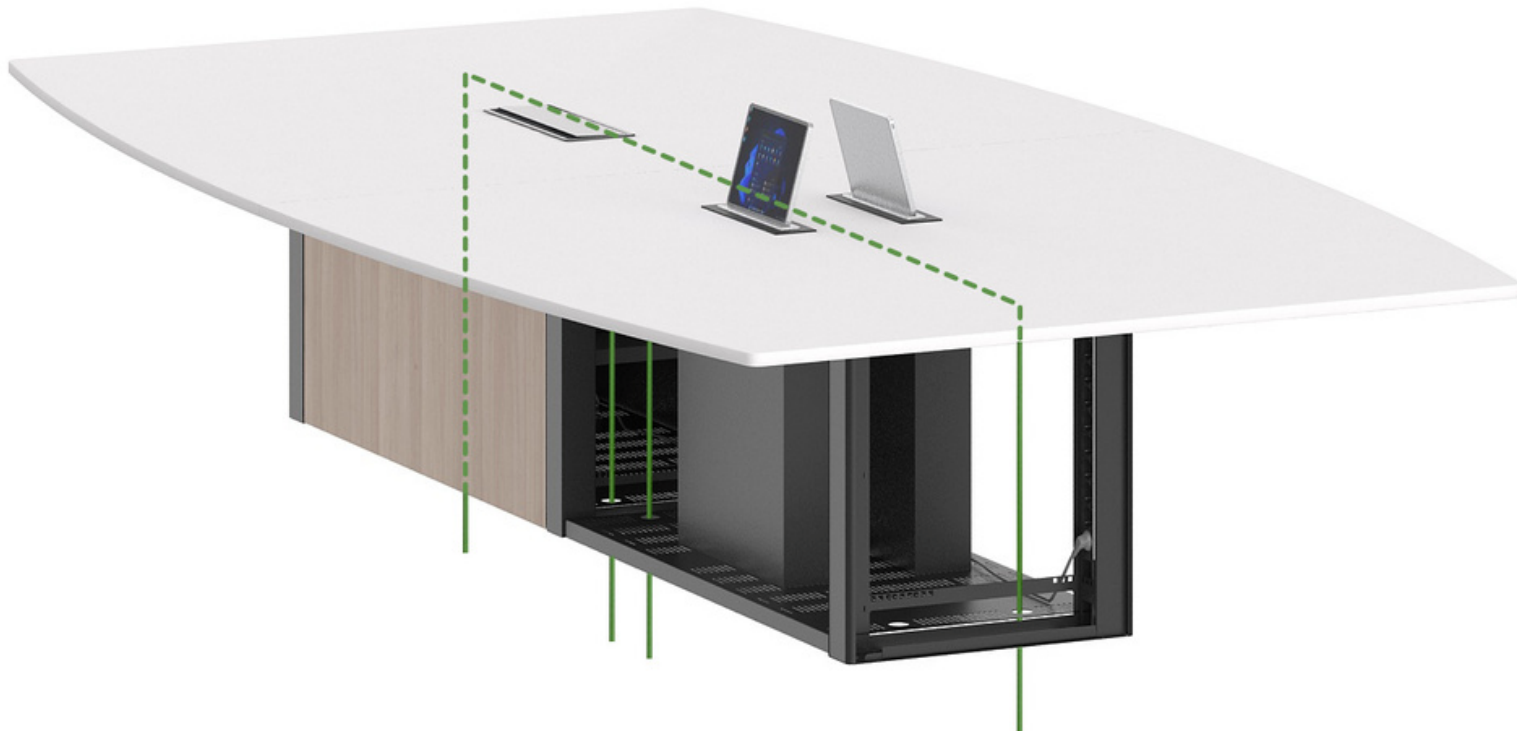

Available Configurations:

- **Straight** – A clean, linear setup ideal for executive briefings and streamlined communication
- **V-Shape** – Promotes engagement and visibility, ideal for hybrid meetings and presentation-focused discussions
- **Oval** – Enhances eye-communication and team discussion

Each configuration is designed to optimize eye contact, spatial flow, and collaborative efficiency, depending on your team's interaction style and room dynamics.

ELEGANCE. FUNCTIONALITY. INTEGRATION.

Elevate your meeting space with BOARD—where modern aesthetics meet cutting-edge collaboration.

EXECUTIVE

Sleek design perfect for hybrid and executive spaces. It features a technical beam for an organized setup of small devices and cables.

Sleek. Smart. Scalable.

A Future-Ready Solution for Hybrid & Executive Spaces

Blending modern aesthetics with intelligent design, this workspace solution is tailored for today's agile environments. Its refined, architectural profile complements both executive suites and hybrid meeting rooms.

Built-In Intelligence

A discreet technical beam integrates seamlessly into the design, offering dedicated pathways for device setup, charging docks, and cable routing. This ensures a clutter-free surface, supporting both form and function.

Modular by Nature

The system's modular construction allows for scalable layouts—whether for focused team collaboration or flexible, reconfigurable zones. Components adapt to shifting needs, making it ideal for evolving workplace strategies.

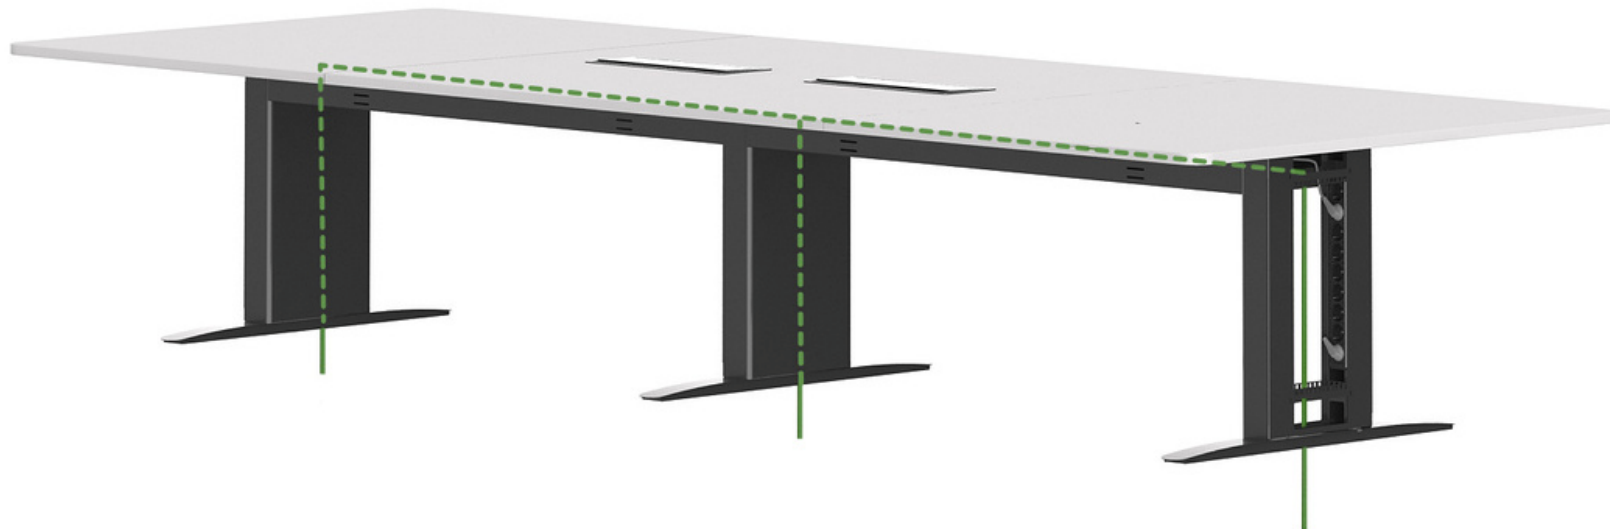

Available Configurations:

- **Straight** – A clean, linear setup ideal for executive briefings and streamlined communication
- **V-Shape** – Promotes engagement and visibility, ideal for hybrid meetings and presentation-focused discussions
- **Oval** – Enhances eye-communication and team discussion

Each configuration is designed to optimize eye contact, spatial flow, and collaborative efficiency, depending on your team's interaction style and room dynamics.

Sustainability & Performance Highlights

- Designed with recyclable and responsibly sourced materials
- Available with low-emission finishes and acoustic-enhancing options
- Smart cable management and multiple access points for discreet integration of meeting room technology

CONFERENCE

Telepresence room table, designed to improve content viewing and interaction in large meetings.

Smart Design for Modern Collaboration

Purpose-built for interaction, this executive meeting desk is the perfect centerpiece for both in-person and hybrid meetings. Thoughtfully designed to encourage dialogue, it enhances team engagement through eye contact and spatial clarity.

Personalization & Acoustic Performance

Removable front covers made from PET recycled material, improving room acoustics while reinforcing our commitment to sustainability. This solution reduces echo and ambient noise—crucial for video conferencing, boardroom presentations, and strategic discussions.

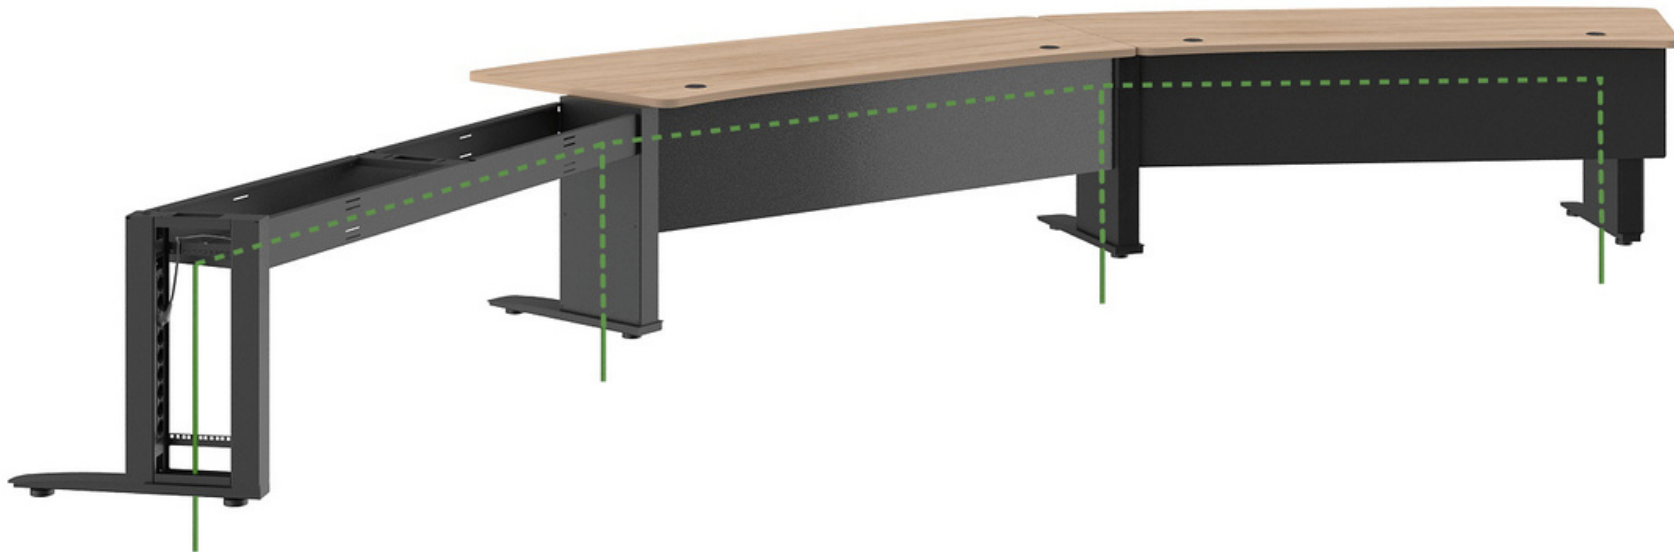

Available Configurations:

- **ARC** – fosters a roundtable atmosphere ideal for videoconference discussions
- **U-Shape** – supports remote participation with a clear front-facing view
- **V-Shape** – ideal for directional presentations and dynamic collaboration

Each shape is optimized to balance visibility, functionality, and elegance—transforming any meeting room into a professional forum environment.

Form Meets Function.

With its elegant design and technical precision, this desk redefines the executive meeting experience—delivering aesthetics, acoustics, and adaptability in one seamless solution.

HUDDLE *Compact and technological solution for quick, collaborative meetings in small teams.*

HUDDLE

Smart Collaboration for Open, Hybrid Workspaces

HUDDLE is an all-in-one furniture solution for informal meetings, presentations, and hybrid collaboration—perfect for modern office environments.

- **Integrated Technology** – Combines screens, connectivity, and furnishings in one seamless unit
- **BYOD-Friendly** – Easily connect personal devices for fast, flexible collaboration
- **Optimized Cable Management** – Clean look with easy access for maintenance
- **Supports Multiple Formats** – Compatible with various equipment and screen sizes
- **Functional + Aesthetic** – Designed to enhance open spaces and foster creativity

Ideal for teams, designers, and facility planners, HUDDLE turns any corner into a high-performance collaboration zone.

HUDDLE

AUDITORIUM

Functional furniture solutions integrating lecterns, technical tables, and specialized paneling to optimize design and technology in the auditorium.

AUDITORIUM

Functional Design for Powerful Communication

The auditorium is a vital space for presentations, dialogue, and engagement—and it demands furniture solutions that deliver on functionality, technology, and design.

- **AV-Integrated Lecterns** – Designed for seamless control and clear presentation
- **Technical Tables** – Simplify management of AV devices and equipment
- **Specialized Wall Paneling** – Enhance acoustics, space organization, and aesthetics
- **Project-Based Flexibility** – Modular elements tailored to your specific needs
- **Institutional Image** – Professional finishes that elevate your brand presence

Perfect for corporate, academic, or cultural environments, our auditorium solutions combine modern design with smart functionality—for a space that communicates with impact.

MEDIA BOX

The Media Box is a modular, stylish furniture solution for collaborative spaces that discreetly integrates and organizes AV equipment, allowing easy installation and maintenance.

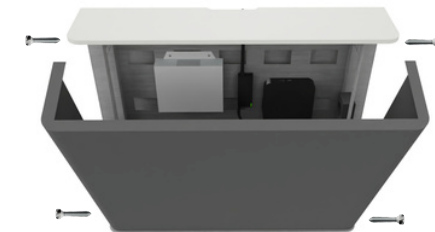

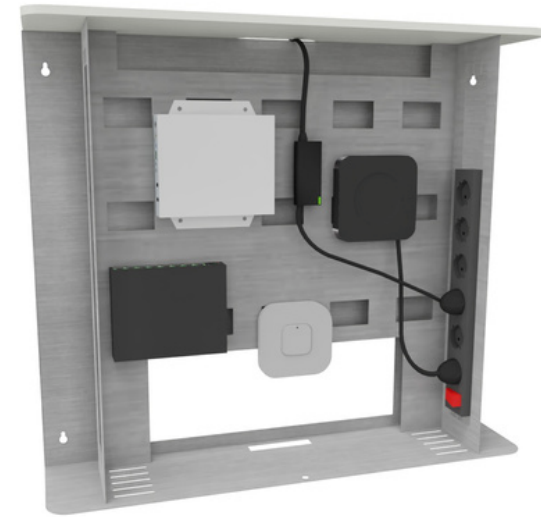

MEDIA BOX

Discreet. Functional. AV-Ready.

Media Box is a compact, wall-mounted furniture solution designed to support collaborative and digitalized spaces with seamless technology integration.

- **Configurable Design** – Modular unit with metal structure and phenolic top
- **Space-Efficient & Wall-Mounted** – Blends into the room while housing essential AV hardware
- **Versatile Interior** – Supports horizontal and vertical mounting for devices like Clickshares, switchers, and connection boxes
- **Easy Access** – Simplifies installation and ongoing maintenance
- **Clean Aesthetics** – Curved front panel in metal or acoustic finish for a modern, tidy look

Ideal for meeting rooms, classrooms, or hybrid workspaces, Media Box delivers discreet performance where technology meets design.

PET Acoustic Panels

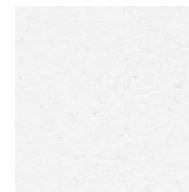

Sustainable Acoustics with Style

Made from recycled plastics, PET acoustic panels are an eco-friendly solution that enhances both sound quality and interior design across diverse spaces.

- **Eco-Conscious Design** – Produced from recycled bottles, supporting the circular economy
- **Acoustic Performance** – Effectively reduces reverberation and noise in busy environments
- **Durable & Safe** – Fire-, moisture-, and microbe-resistant, ideal for offices, schools, videoconference rooms, collaborative rooms
- **Versatile Aesthetics** – Available in a wide range of colors, shapes, and textures
- **Easy Installation & Maintenance** – Lightweight, user-friendly, and low upkeep

Combine sustainability, functionality, and visual appeal with PET panels—a smart choice for modern interior projects.
