The Benefits of Our Products

- **Our technology enhances and improves the interaction and collaboration between a presenter or teacher and their students or audience.**
- **Schools use our displays for remote, hybrid, and in classroom academic workflow to improve students' attention and participation.**
- **Our interactive touch displays are very effective tools for presenting in small to mid-sized meetings. Bringing all team members into one space real-time, allowing annotation collaboration across the meeting content. Turning tedious meetings into lively engaging environments**

StarBoard - Locations

PRODUCT OVERVIEW

- **Interactive technology is made to assist learning, teaching, presenting, and engagement.**
- **Divided into different sectors, StarBoard range of products is for classrooms and boardrooms.**

PRODUCT OVERVIEW

- Finger Driven Interactivity
- Latest Interactive Technology
- Robust Collaborative Software
- Full interactivity and technology are accessible with the touch of a finger
- Research and development are in place to deliver high-standard technology
- innovation in the field
- Integrated Interactive Software programs in every StarBoard product

Improving Education Outcomes

- Our interactive technology, combined with a digital curriculum, improves students' engagement.
- Collaboration with their teachers improves their ability to learn and concentrate.
- Interactive displays allow teachers to use their favorite software and online meeting applications
- The students are more involved and energized which improves their retention of lesson content.
- Allows teacher to connect their own devices and make use of their favorite applications and also make use of StarBoard software.

Improve Your Meeting Outcomes

- When you use an interactive display, you can make use of touch or a pointer or a pen for annotation and highlighting which improves the interaction and attention of your audience.
- StarBoard's interactive displays come with a business app store on your Android which is pre-installed. It also includes StarBoard Software on the operating system for use in conferencing and collaborating with remote attendees.
- You can plug your PC, Mac, or Chrome Book into the StarBoard display, view and touch your content, and navigate directly on it.
